Spotify Open Recommendation Engine

Sprint Review | Team Spotify Squad
Sprint 3 | 3 November 2021 ~ 16 November 2021

Actions to stop doing:

- Stop *not* using Trello
  - → it's really useful to see what other folks on the team are working on

Actions to start doing:

- Start checking in code (& running it through CI) more regularly
  - → it's good practice to enforce good style & quality at regular intervals
- Start filling in documentation
  - → setup/README, testing plan/report, … (see class requirements)
- Start working on testing plan
  - → discuss strategies for unit testing, *do* unit testing, evaluate unit testing - it's important!

Actions to keep doing:

- Keep up the good vibes & communication :~)
- Keep sharing feedback & resources
- Keep being respectful of each other (and mindful of people's time/schedules)

Work completed:

- [BE] Search for a song
- [BE] Endpoint for retrieving song metadata
- [BE] Update PythonAnywhere with the latest code
- [BE] Create the playlist, populate it, and send data to FE
- Integrate the frontend with the backend

Work not completed:

- [FE] Song info layout

- [FE] List view of songs in generated playlist
- Documentation !!!
- Unit tests

Work Completion rate:
- Tasks completed: 5
- Days in Sprint 3: 13
- Average tasks completed/day: 0.4
